imprivata®

Imprivata Mobile Access Management QuickStart program

Accelerate time-to-value for your shared mobile program with industry-leading access management, hands-on expert implementation, and intuitive tools to manage your devices
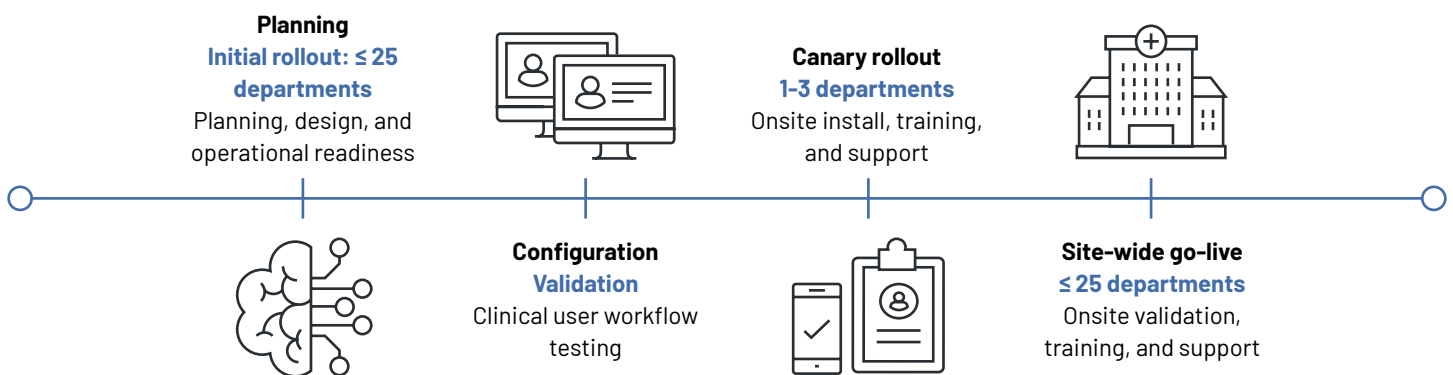

With a typical organization losing 16% of their mobile devices a year and the average cost of a data breach sitting at over $9M, it's imperative that organizations quickly implement Imprivata Mobile Access Management (formerly Imprivata GroundControl) to support shared device security and data privacy. Leveraging the same simple and seamless authentication users experience across desktops and other supported endpoints, Imprivata Mobile Access Management customers quickly reap the benefits of time savings, decreases in device loss, improved data privacy, and increased adoption of mobile apps and workflows.

"With Imprivata, we know who has a device checked out and where it is at any given time. We can send reminders to the staff if they're leaving the building, and they still have the device, which is great. The loss rate of these devices is close to zero."

– Felix Zhang, Chief Technology Officer, Mackenzie Health

QuickStart your mobile success

Imprivata has developed a mobile QuickStart program to accelerate time-to-value for your mobile access management project, while at the same time reducing the burden placed on your team to quickly scale. With the QuickStart package, you'll receive all necessary licensing and hardware to enable your end users with simple, convenient device check-out and SSO, robust analytics to continuously optimize your environment, and a simple services program where Imprivata's expert implementation engineers will take you from planning to site-wide go-live in just 3 months.

Planning
Initial rollout: ≤ 25 departments
Planning, design, and operational readiness

Canary rollout
1-3 departments
Onsite install, training, and support

Configuration
Validation
Clinical user workflow testing

Site-wide go-live
≤ 25 departments
Onsite validation, training, and support
